Sir:

Prior to examination, please amend the above-identified application as follows:

IN THE CLAIMS:

Please enter the following amended claims:

A¹

6. A radiation solid-state detector according to claim 1, wherein a charge transporting layer which acts roughly as an insulator for said latent image charges, and roughly as a conductor for charges opposite in polarity to the latent image charges is provided between said photoconductive layer for recording and said photoconductive layer for reading, and the charge transporting layer forms said charge storing section.

7. A radiation solid-state detector according to claim 1, wherein a trap layer for catching said latent image charges is provided between said photoconductive layer for recording and said photoconductive layer for reading, and the trap layer forms said charge storing section.
